11 November 2023

Jubilee Street Stormwater Drainage Works

Council provides the following advice to local residents and businesses of Jubilee Street that stormwater drainage works are currently being programmed for commencement on 23 November 2023, weather permitting.

These works will improve stormwater drainage issues in Jubilee Street. Proposed works include the installation of a new stormwater pipeline along Jubilee Street to improve capacity. The project will include the installation of new stormwater pipes, pits, and other drainage infrastructure. At this stage, Council anticipates that the stormwater upgrades will take approximately 15 days to complete, weather permitting.

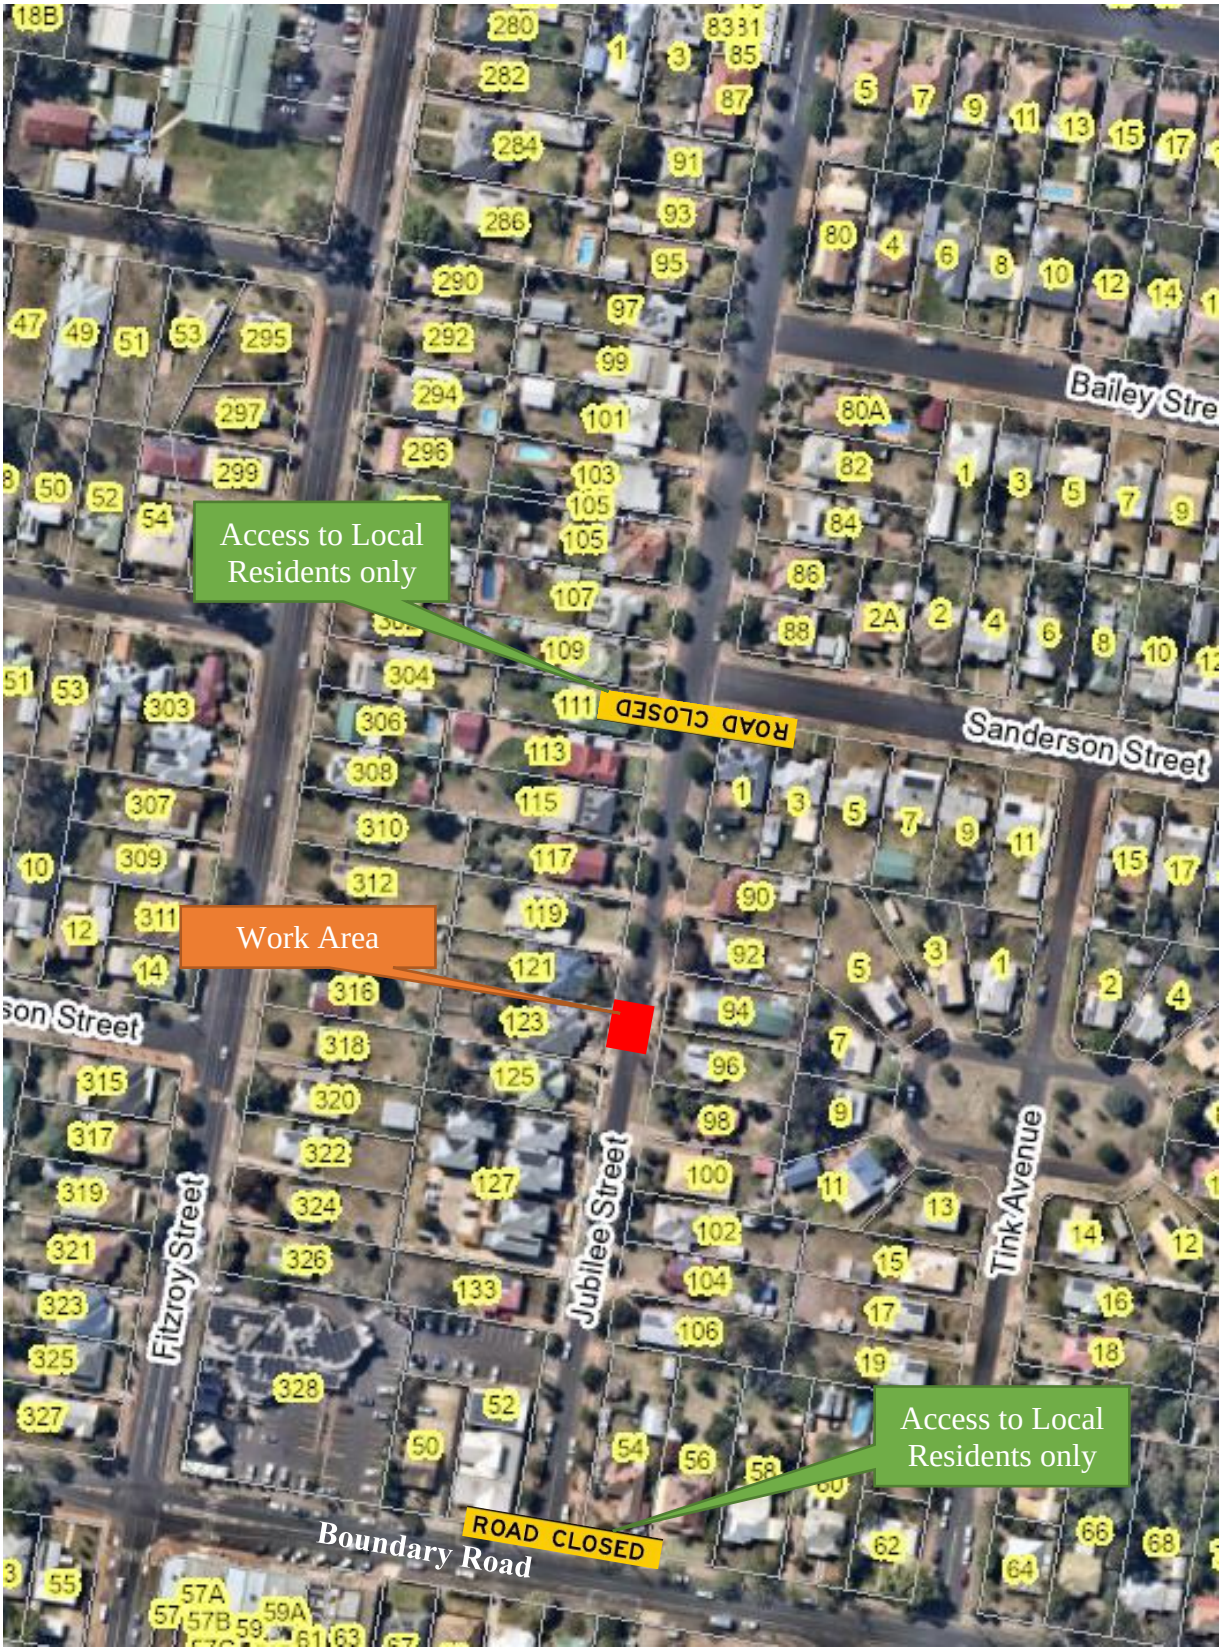

During each work shift, Jubilee Street will be subject to traffic restrictions between Boundary Road and Sanderson Street. At this location the road will remain open for local residents to access their properties under the direction of traffic controllers, however the road will be closed at the worksite (for more details please refer to the attached map). Outside of each work shift Jubilee Street will be fully open to traffic. Council will liaise further with residents and businesses prior to work commencing onsite.

Council understands that these work may cause disruptions to driveways and footpaths. However, these disruptions will be confined to the construction zones only. Council wishes to notify to the residents that there will be some noise associated with these works, however Council will endeavour to minimise the disturbance to residents.

Council acknowledges the inconvenience these works may cause and thanks you for your continued understanding during these infrastructure improvement works.

If you have any further concerns please contact Council's Project Engineer, Umesh Khatri, during normal office hours, on 02 6801 4000.

Umesh Khatri
