Taylor Street Stormwater Construction Works

Council provides the following advice to local residents of Taylor Street that stormwater drainage works are currently being programmed for commencement on 20 November 2023, weather permitting.

These works will improve stormwater drainage issues in Taylor Street. The proposed works include the rehabilitation of an existing stormwater pit to improve its capacity. Council anticipates that the stormwater upgrades will take approximately three days to complete, weather permitting.

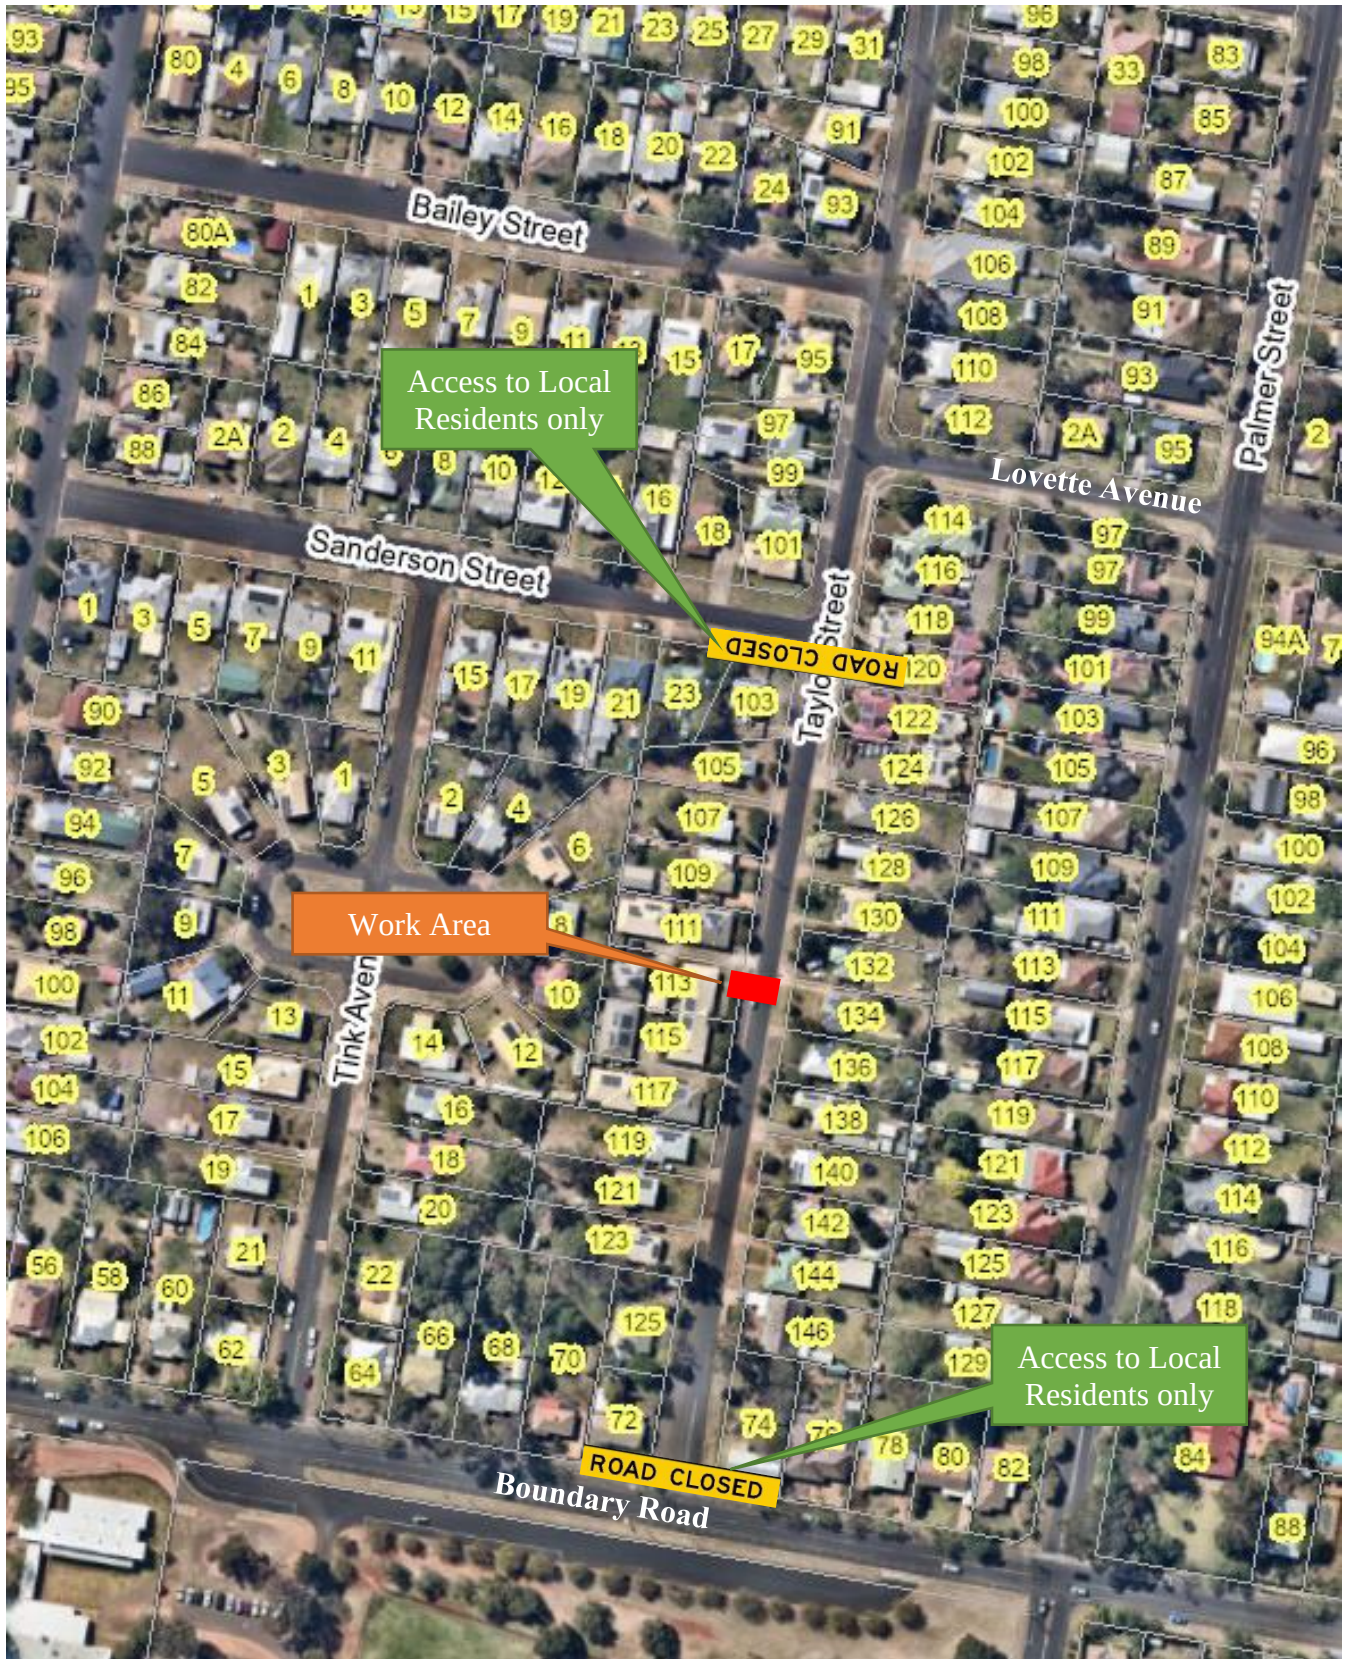

During each work shift, Taylor Street will be subject to traffic restrictions between Boundary Road and Sanderson Street. At this location the road will remain open for local residents to access their properties under direction of traffic controllers, however the road will be closed at the worksite (for more details please refer to the attached map). Outside of each work shift Taylor Street will be fully open for traffic movements. Council will liaise further with local residents prior to work commencing onsite.

Council understands that these work may cause disruptions to driveways and footpaths. However, these disruptions will be confined to the construction zones only. Council wishes to notify the residents that there will be some noise associated with these works, however Council will endeavour to minimise the disturbance to residents.

Council acknowledges the inconvenience these works may cause and thanks you for your continued understanding during these infrastructure improvement works.

If you have any further concerns please contact Council's Project Engineer, Umesh Khatri, during normal office hours, on 02 6801 4000.

Umesh Khatri
